

## TRAVELING MAN PRAISES PLANT JUICE

J. F. CARTER, TRAVELER AND  
SALESMAN, TELLS OF THE  
USE OF PLANT JUICE.

Here is a man who was forced to give up his position on account of poor health, and who has for four years as he expresses it, been down and out. He is Mr. J. F. Carter of 723 North Pearl, Dallas, and his statement is a splendid tribute to Plant Juice.

"I am 54, have been a traveling salesman for the Connolly Manufacturing Company of New York and have traveled all over the United States many times. It seems I have had almost everything possible the matter with me, a chronic stomach and kidney trouble that affected my bowels, nerves, liver and blood. For four years I have been unfit for business until Plant Juice brought me relief. It is wonderful what it has done for me. It has cured me and made me strong and hearty, and done it in a very few weeks. To show you that I am a well man, free of stomach and kidney troubles, I have been testing myself; have eaten things hard on the kidneys, but they don't affect me any more. I am convinced that I am permanently cured and am again ready to enter a business life."

For the relief and cure of all stomach, liver, kidney and blood ailments, Plant Juice is the greatest corrective and tonic of the age. It is made from the juices of pure, fresh herbs of many countries. It restores vitality, puts new life and energy into you. Sold at Thompson's.

## Men Welcome Mother's Friend

A Duty that Every Man Owe to Those  
who Perpetrate the Race.

It is just as important that men should know of progressive methods in advance of motherhood. The suffering, pain and distress incident to child-bearing can be easily avoided by having at hand a bottle of Mother's Friend.

This is a wonderful, penetrating, external application that relieves all tension upon the muscles and enables them to expand without the painful strain upon the ligaments. Thus there is avoided all those nervous spells; the tendency to nausea or morning sickness is counteracted, and a bright, sunny, happy disposition is preserved that reflects wonderfully upon the character and temperament of the little one soon to open its eyes in the world at the joy of its arrival. You can obtain a bottle of "Mother's Friend" at any drug store at \$1.00, and it will be the best dollar's worth you ever obtained. It preserves the mother's health, enables her to make a quick and complete recovery, and thus with renewed strength she will eagerly devote herself to the care and attention which mean so much to the welfare of the child. Write to the Bradford Regulator Co., 122 Lamar Bldg., Atlanta, Ga., for their valuable and instructive book of guidance for expectant mothers. Get a bottle of Mother's Friend today.

## LOCKNEY IS MUDDY AND PROSPEROUS

INCREASED YARDED CROPS—  
ABUNDANT RAIN—IRRIGA-  
TION PROMISE WEALTH

By Staff Correspondent.

LOCKNEY, Texas, June 6.—Lockney just reminds your correspondent of a story. Representative Mudd, of Maryland, once, while enroute between Baltimore and Washington, met an Irishman "dorr," asked the Irishman, "what might your name be?" My name, replied the distinguished Congressman, is Mudd.

"Be gorr," exclaimed the son of the Emerald Isle, "and the glad I am to meet you, my name is Dennis."

Lockney's name is not Dennis, but it surely is mud—for the town and region have just received their usual soaking May-June rains and while the unregenerate Lockney visitor is tempted to swear at the mud he is broadly joining the general local smile over coming bountiful harvests.

Forty Thousand Fertile Acres.

Last year thirty thousand acres were cultivated in the immediate Lockney vicinity—figures which this year are swelled to at least forty thousand acres with an increase of general cropage returns corresponding to the famed fertility of Lockney lands.

Cotton and Cash Still Coming.

Year before last over 5,000 bales of cotton were shipped from Lockney. Last year 2,500 bales were shipped—the decrease being due to a comparatively reduced acreage. This year—with an acreage largely in excess of that of year before last and present excellent growing conditions—Lockney will probably ship over cotton marketing to 7,000 bales. This season's increase in cotton acreage is owing to the fact that yet other Lockney farmers have been taught by their neighbors' happy experience that cotton is cash and that each in hand commands the glad hand from the world at large.

The Golden Calf has long been famous and away back yonder devils were cast out of exile, but, valuable as are these two stock industries, there is more annual comparative ready money in Lockney cotton than any other one return of Lockney field, pasture or pen.

Row Crops

Lockney row crops chiefly milo maize and kafir corn—indicate their usual heavy yields, while Indian, in occasional acreage is still valuable, telling local farmers that it is, if properly handled, a great farming asset.

In a Ratio of Sixty Bushels Per Acre.

Geo. W. Brewster, proprietor of the pleasant Brewster House, and also one of Lockney's still hard working daddies, has, in his hotel garden grounds, an 8th of an acre which for the last three years he has planted in corn for roasting ear use and which, if allowed to attain full maturity, would have produced, year in and out at the rate of 60 bushels per acre.

With this corn patch, Mr. Brew-

ster, however, establishes an active friendship and close relation. In the fall he plow the land deep, plows it and pulverizes—and then pulverizes it some more—in the spring—planting the corn not later than the third week of March.

From the above, it appears that the more or less agitated problem as to whether or not Indian corn can be successfully grown in the Lockney region, can be affirmatively solved by an agitation of corn land itself.

Pumps, Pumpers and Pumpists.

The Lockney region is now—if not deep—in pumps, with a variation of big pumps, nearly as big pumps, somewhat smaller pumps, little pumps, gasoline and oil engine pumps, windmill pumps, hand pumps, and very large gentlemen's dancing pumps.

In big well pumpage irrigation local plant has a discharge of from 800 to 1,000 gallons per minute and will add a reservoir capacity, sufficient to insure an irrigation of about 200 acres—175 acres of which will be milo maize and kafir corn, four acres of oats under this plant indicate a yield of 16 bushels per acre and it is thought that oats here under well pumpage will return 125 bushels per acre.

The Merrimether Hardware and Furniture Company—Lockney windmill headquarters—count their Floyd county windmill sales by the hundreds and anticipate a heavier business this year than ever before.

In addition to its supply of pure water for domestic and stock purposes, the local windmill plant irrigates a great many big gardens and small fruit tracts—small gasoline engine pumps being also used in this happy direction.

One of the Syndicate Homes.

The Lockney vicinity is one of the home localities of the mammoth well pumpage irrigation syndicate which has headquarters at Plainview, and is known as the Texas Land and Development Co.

Up to date the syndicate has arranged for the installation of about 25 big pumpage plants in an immediately surrounding Lockney radius, the concerned land, being of exceptionally shallow water depths.

Milo Maize, Kafir and Silage.

The new and strong trend of Lockney farmers, to home block meat cattle and hogs for export markets on milo maize and kafir corn instead of market shipping these grains themselves, is to be superlunally reinforced by a general turning in of silage about a dozen of which have already been contracted for with a probable total erection this season of these great beef and pork producers.

Scope of the Silo.

The farmers that have had most experience with silage are the most enthusiastic advocates of the silo. It is unnecessary to argue with those who are already the happy possessors of a silo for it is a general experience where a farmer has only provided for immediate wants in building his silo that he will build another as soon as he learns how well his stock does on it. The life of the silo should be carefully considered in connection with its initial cost, and the farmer should make the mistake of building anything but the best, if he wishes to economize to the greatest advantage.

It has been said, however, makes two blades of grass grow where but one grew before is a benefactor to mankind. A silo makes it possible to realize two crops where but one was realized before and who would not gladly double his income.

Silo and Silage.

A silo is one of the time conservators of the nation's resources, and especially is this true in West Texas. Several State experiment stations have estimated that forty per cent of the value of the corn is in the stalks, almost all of which is saved in June into the silo. The silo will enable stockmen and dairymen to keep more cattle on the same size farm at less expense and maintain the herds in better health, and increase the milk flow. Silage is kept in the silo very much as fruit, vegetables and other kind of human food are preserved in air tight cans.

The germs which cause fermentation can grow only when supplied with oxygen, and if air is kept from silage it can be preserved for an indefinite period of time. As soon as the silo is filled fermentation begins continuing until the supply of oxygen is exhausted. If the silage is well packed and was cut at the right stage neither too green nor too ripe it will continue to ferment but for a short time, and will be practically uniform below the top coating. The sweetness of the silage depends upon the stage to which the fermentation is carried, and the subsequent exclusion of air.

The best silage can be made only in a practically air tight silo.

Some one has compared the difference between silage and dry feed to that of a juicy ripe apple and the green dry fruit. Because of its succulence silage has a beneficial effect on the digestion of the animals and they become very fond of it. The economy of storing silage is a feature which appeals at once to the average farmer.

The Missouri Farmer Bulletin No.

Eleven, sums up the advantage of silage as follows:

FIRST—Silage keeps your stock healthy and growing all winter.

SECOND—It produces fat beef more cheaply than does dry feed.

THIRD—It enables cows to produce milk and butter more economically.

FOURTH—Silage is more convenient to handle than fodder.

FIFTH—The silo prevents waste of the stalks and there are no stalks in the feed lots when silage is fed.

SIXTH—The silo will make palatable food of stuff which would not otherwise be eaten.

SEVENTH—It enables a large number of animals to be maintained on a given number of acres.

EIGHT—It enables the farmer to save feed which could otherwise be wasted.

NINTH—It is the most economical method of supplying food for stock during the hot dry periods in summer when the pasture is short.

In feeding silage it should always be taken from the top of the silo. If it were taken from the bottom it would cause an opening which would admit air and thus produce fermentation.

The silage must be fed off in layers of at least two inches each day to prevent fermentation or mold. The object should be to leave the surface of the silage as level as possible in order to present the smallest possible surface to the air.

Produce Shipments.

Lockney is a noted poultry, egg and butter shipper—her last year's concerned business being estimated at \$15,000—in which connection the recently established and rapidly growing Lockney Farmers' Exchange shipped to Amarillo alone in the last past months of April and May over \$1500 worth of poultry, eggs and butter.

While chickens are at present the most prominent poultry, turkeys are being heavy and fast scratching.

Butter is of the best and cream of the choicest.

Lockney Building.

For several years past Lockney has been an active and liberal investor in brick and mortar—the latest illustrations being the new practically completed new State Bank block at a cost of \$18,000, and still constructing new First National Bank which will cost, with equipments—about \$15,000.

Ground is soon to be broken for a new \$5,000 brick business building.

Lockney has a population of 1500, special civic, educational, moral, social, commercial equipment and is a favored Santa Fe railroad point—a fact amply evidenced by the presence of station agent, C. C. Miller.

The town has an elevator and chop feed mill; two gins, almost metal works; and the Deacon newspaper which ever glows with a steady flame interspersed with brilliant contributions.

This year the town is to have an old-fashioned Fourth of July celebration with a beautiful barbecue attachment.

Regular Enough to Suit Unions.

(From the Philadelphia Record.) Obviously the president made a big mistake in not making Samuel Gompers ambassador to the Court of St. James.

Mysteries of Death.

There are those who think of death with a shudder, and of the other world with a sinking heart, because death seems to be a breaking of all the ties which are sacred, and a transference of the soul into a foreign world, writes Charles E. Jefferson, D. D., LL. D., pastor of the Broadway Tabernacle, New York City. The world in which we now live is dear to us because we know it so well. It is cozy and warm, and we prefer it to any world of which it is possible for us to think. The heart likes the old. It shrinks from the untold. But the message of Easter is that the other world is our home just as this one is. The universe is a big house containing many rooms, and we pass from one room to another. The home in all its parts has been furnished and is conducted by infinite love. The baby does not feel himself a stranger when he comes into our world. Love has prepared the way for him, and love has also prepared the way for us in the world eternal.

We are not going to a foreign land, we are not to live in the midst of strangers, we are not to suffer from homesickness in a world that is cold and strange—we are going home. From the first hour we shall feel at home, and we shall fall in at once with the ways of life there, and shall find ourselves in the presence of friends. It is an old question which has haunted the human mind from the beginning: "If a man die, shall he live again?" Easter says, "Yes!" and declares that in the hour of death, a man stands up alive, and complete, and at home.

When Jesus presented himself to his disciples on the first Easter they knew him. They found him to be the same friend which he had always been. His disposition had not changed, nor his attitude to them, nor his purposes for the world. He was the same Jesus. "It did not yet appear what we shall be," but of one thing we may be certain, and that is that we shall always be ourselves, that our friends shall be themselves, and that the Christ we have known here will be the same Christ forever.

## BANK OFFICER CLEARED BY COURT RULING

CINCINNATI, Ohio, June 6.—

Through a ruling of Judge Caldwell of the Common Pleas Court today, George E. Cox, former president of the defunct Cincinnati Trust Company; O. V. Parish, N. S. Keith, F. R. Williams and Charles H. Davis, directors and officials of the bank, were cleared of a Grand Jury indictment charging misapplication of a note of \$322,500 which was deposited by directors of the bank to make good securities of the Ford-Johnson Chair Company which had been ordered out of the bank by a deputy state examiner.

In his ruling Judge Caldwell held that the note was good for its face value and that there was no evidence of its abstraction or misapplication.

Attorneys for Cox and other defendants are trying to arrange for an early hearing on the charge that there was a misapplication of \$115,000 of funds of the bank.

IN THE UNITED STATES DISTRICT COURT FOR THE NORTHERN DISTRICT OF TEXAS, AMARILLO DIVISION.

IN THE MATTER OF P. L. HANCOCK & SONS, Bankrupt. No. 29 in Bankruptcy.

TO THE HONORABLE EDWARD R. MEERS, JUDGE OF SAID COURT.

P. L. Hancock & Sons of Silverton, in the County of Hriscoe, and State of Texas, in said District, respectfully represents:

That on the 24th day of March, last past, it was adjudged bankrupt under the acts of Congress relating to bankruptcy, that he has duly surrendered all its property and rights of property, and has fully complied with all the requirements of said acts and of the orders of the court touching its bankruptcy.

WHEREFORE IT PRAYS, That it may be decreed by the court to have a full discharge from all debts provable against its estate under said bankrupt acts, except such debts as are excepted by law from such discharge.

Dated this 21st day of May, A. D. 1913.

P. L. HANCOCK & SONS, by P. L. Hancock, Bankrupt.

Subscribed and sworn to before me by P. L. Hancock this 28th day of May, A. D. 1913.

T. L. ANDERSON,

County Clerk, Hriscoe County, Texas.

Notice of Order Thereon.

NORTHERN DISTRICT OF TEXAS: On this 6th day of June, A. D. 1913, on reading the foregoing petition, it is

ORDERED BY THE COURT, That a hearing be had upon the same on the 8th day of July, A. D. 1913, at my office in Amarillo, Texas, in said District, at 9 o'clock a. m.; and that notice thereof be published in the Amarillo Daily News, a newspaper printed in said District, and that all known creditors and other persons in interest may appear at the same time and place and show cause if any they have, why the prayer of said petitioner should not be granted.

AND IT IS FURTHER ORDERED BY THE COURT, that the Clerk shall mail to all known creditors copies of said petition and this order, addressed to them at their places of residence as stated.

Dated June 6, 1913.
